

## EUROPEAN HUMAN BIOMONITORING INITIATIVE (HBM4EU) IMPACT LEAFLETS

### STRATEGY FOR A SUSTAINABLE EU-WIDE HBM PROGRAMME AVAILABLE

#### KEY IMPACTS

- A roadmap supports the development of a sustainable HBM network in Europe.
- An EU-wide network of policy makers, agencies, and research institutes has been established during HBM4EU in support of chemical risk assessment and human health.
- Active involvement of regional and national partners through national hub network.
- HBM4EU ambassador, Dr. Thomas Jakl, enhances the sustainability of HBM4EU by advocating the added value of HBM at high level political events.
- The co-funded European Partnership for Chemical Risk Assessment builds further on the legacy of HBM4EU.

### Roadmap towards a harmonized HBM on EU level - building a EU wide network and foster capacities

## Network and ambassador

### Network of national Hubs established in HBM4EU

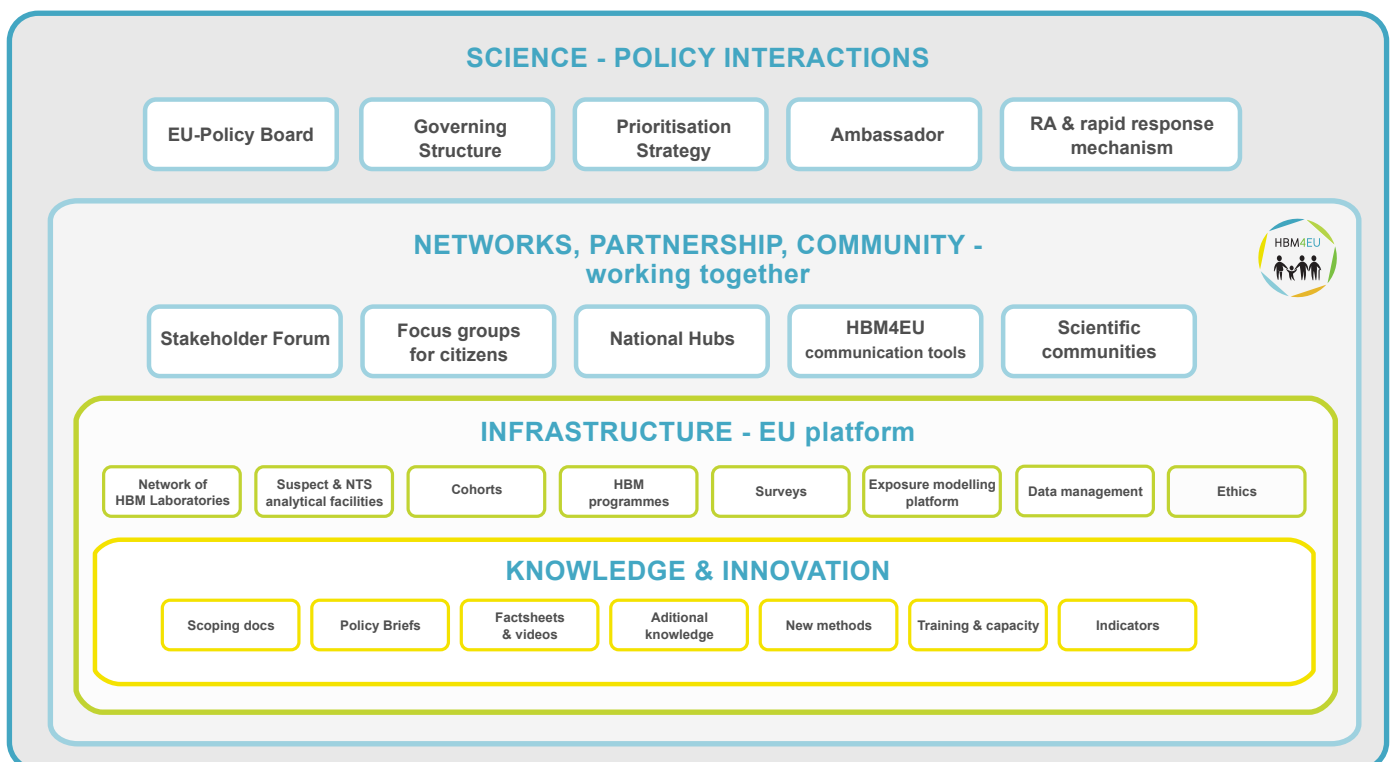

A network of policy makers, agencies, and research institutes has already been established through HBM4EU. By creating a strong partnership with the involvement of NHs from each participating country, HBM4EU paves the road towards a sustained programme.

### HBM4EU Ambassador Thomas Jaki

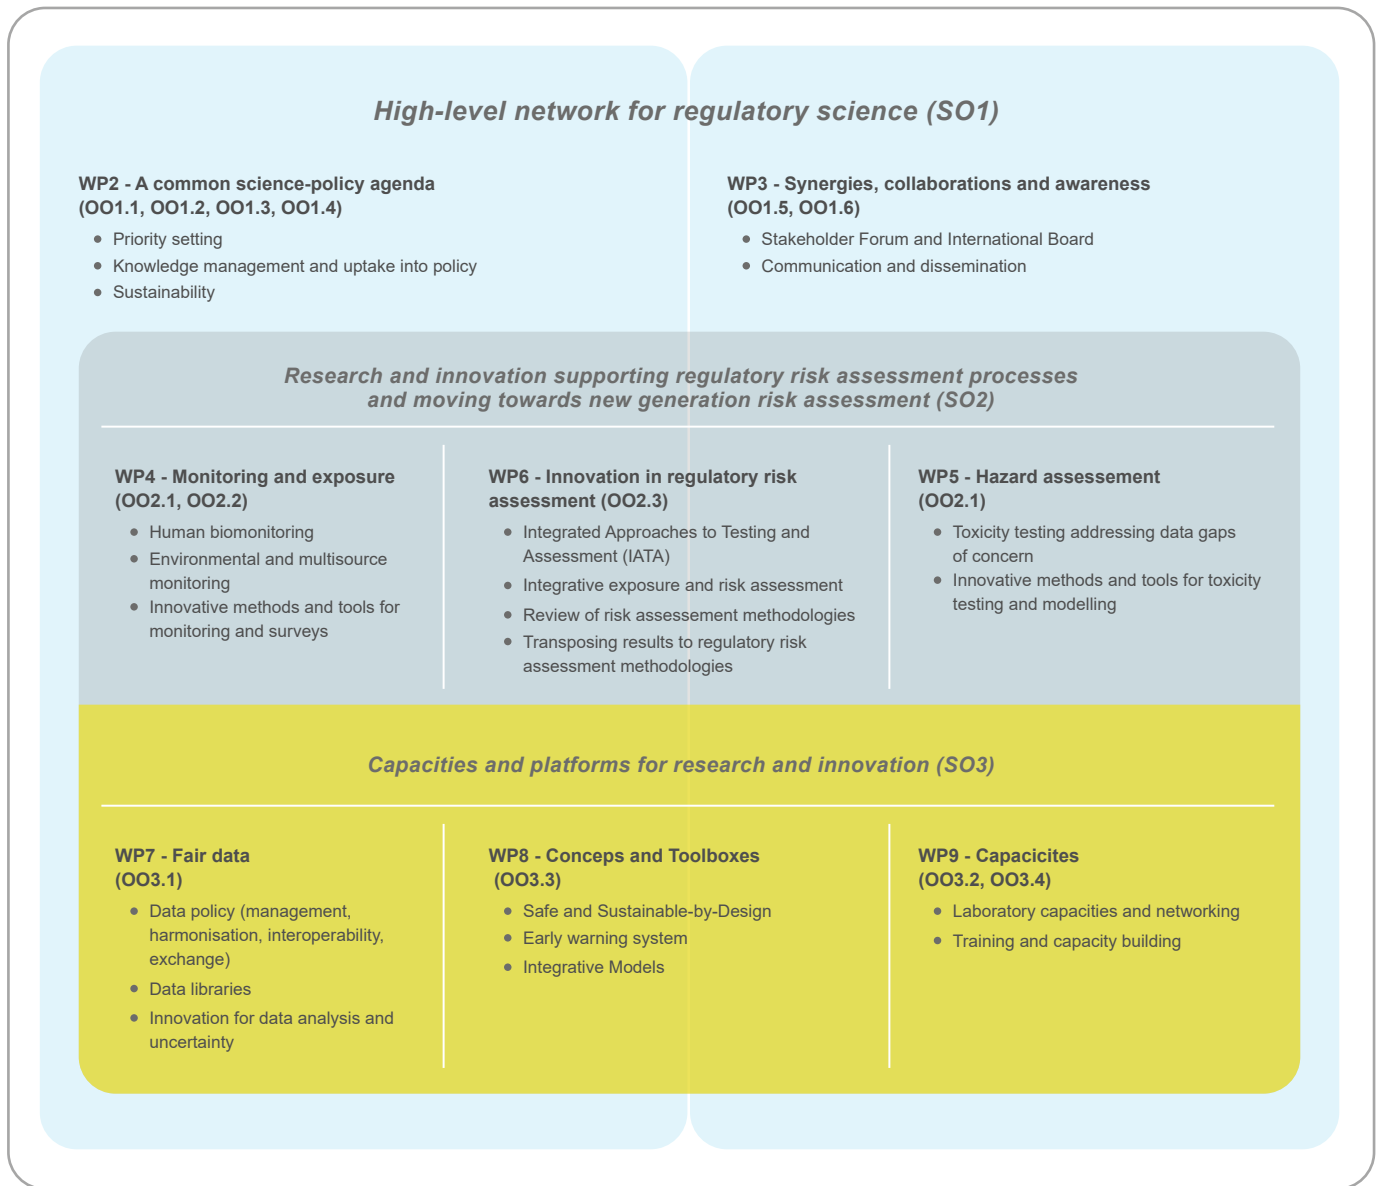

**The HBM4EU ambassador** promotes the sustainability of HBM4EU by representing HBM4EU in various conferences via key note presentations. He managed to integrate the mission of the project and the political need of its follow up into various published conference reports.

## Legacy of HBM4EU for a new partnership
